

68th INTERNATIONAL
TECHNICAL FAIR

May 21-24, 2019

BELGRADE
FAIR

ABOUT FAIR

- Factories of the Future - 4.0 Industry and Smart Factories
- Machine tools, machining and accessories for metal working and forming
- Industrial automation, Electronics and Measuring equipment
- Processing technique equipment (apparatures, machines, driving & related equipment)
- Materials and components, semi finished and finished products for mechanical engineering
- Additive manufacturing and systems + 3D Technologies
- Surface technology
- Welding engineering
- Power Engineering and Heavy Current Electrical Engineering
- Lighting & LED Technologies
- Thermal Science Engineering – HVAC&R (pumps, boilers, drives, hydraulics, pneumatics, cooling technology and air-conditioning, renewable energy sources)
- Water & Gas treatment
- New technologies - innovations, research, transfer of technologies, professional and scientific equipment
- TRANS-BALKAN transport and logistics
- Metallurgy and foundry engineering
- Industrial Safety and Security

International Fair of Technics and Technical Achievements is the elite, the largest, oldest and most prestigious development and technological specialized event in this part of Europe. It is the witness and also the creator of history and an inexhaustible parent nest from which almost all of today's other large specialized fairs, events and ideas have developed.

The International Fair of Technics and Technical Achievements, organized for the first time in 1937, has been a member of the International Fair Union (UFI, Paris) since 1957 and has a great influence on the development of the industry in the country and in the region.

The exhibition is carried out through international exhibitions and commodity groups, which saves time of exhibitors.

It is important to emphasize the fact that the International Fair of Technics is attracting a huge number of foreign business people and partners, who bring the new knowhow and technologies, with the interest for the new arrangements with domestic companies.

Hall 1

Factories of the Future, 4.0 Industry and Smart Factories, tool machines, machining; welding, compressors, measuring equipment, industrial automation, operational systems, robotics, processing equipment; micro & meso-scale machines; additive manufacturing and systems + 3D Technologies....

Hall 1A

Materials, compressors, surface protection, Scientific-technical literature

Hall 2A

Electrical Engineering, equipment and devices for production of electric power, Telecommunications, Installation, Lighting + LED Technologies, Electronics (power, industrial, household), Thermal Science Engineering – HVAC&R...

Hall 2B

Exhibition of new technologies, innovations, professional and scientific equipment supported by Ministry of Education, Science and Technological development of the Republic of Serbia

Hall 2C

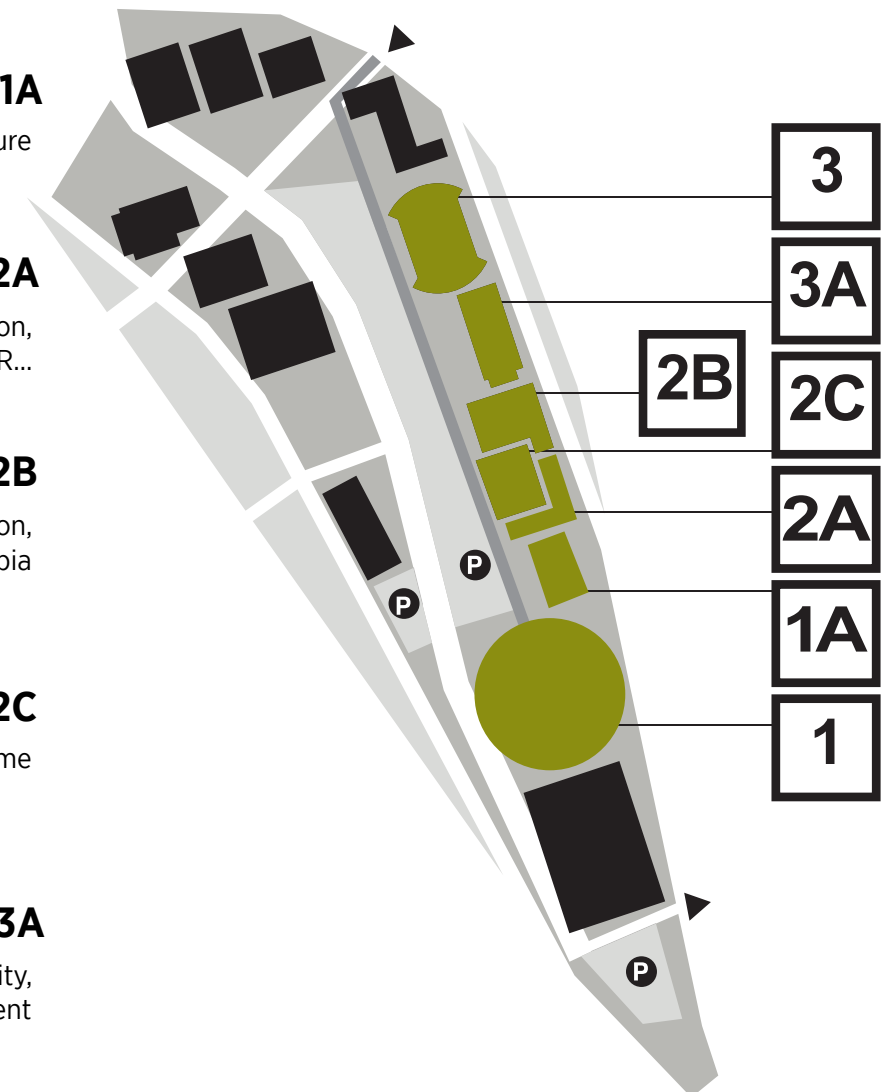

Exhibition of The Serbian Association of Inventors, displays and Exhibition rooms for Accompanying Programme

Hall 3A

Water & Gas treatment; transport and logistics; industrial safety & security, packaging + packing equipment

Hall 3

National exhibitions and joint participation, TRANS-BALKAN transport and logistics, metallurgy and foundry engineering

САЈАМ ТЕХНИКЕ И ТЕХНИЧКИХ ДОСТИГНУЋА У БЕОГРАДУ

Убрзани развој земље кроз иновације

створи proizvode visoke dodatne vrednosti, digitalizacija industrije i usmeravanje ka konceptu industrije 4.0 priznatom kao vodeћom u svetu.

Vlada Srbije, svesna rasta digitalizacije i tehnologije, pokrenula je kabinet ministara чији su osnovni задатак да се бави питањима развоја и иновација и предузетничког екосистема Србије.

Подсетио je da je buzet za inovacije u 2018. uvećan pet puta, da je formiran Savet za inovacione preduzetništvo i informacione tehnologije, kao i da se nada da su neki od izlagača Sajma iskoristili sredstva Fonda za inovacionu delatnost.

Говорећи о тематским целинама које ће бити представљене на овогодишњем сајму, Поповић је тријску роботiku, ин-
